

Over a decade European journey to understand and act upon cybercriminality

CYBERSECURITY SWITZERLAND

- 3rd Edition -

GENEVA - IATA HQ
2nd-3rd DECEMBER 2019

BROUGHT TO YOU BY : 

IN COLLABORATION WITH :

2019

Cybersecurity dialogues (3rd CH, 7th RO, 2nd IT)

Bucharest Talks

2018

Gold medal «Société d'Encouragement au Progrès»

First signatory of the Paris call before its official launch.

Cybersecurity dialogues (IT)
Cybersecurity dialogues (CH)

2017

Launch journal « cybersecurity Trends » (IT, UK)

EU record youth awareness (RO)

Cybersecurity dialogues (CH)

2015

First journal « cybersecurity Trends » (RO, quarterly), issuu.com/cybersecuritytrends

Roaming exhibition, 6 countries, 5 languages, 2 million visitors

ITU recognition for « best practice example for European continent»

2013

 Swiss Web Academy creation

Itinerant sponsored by ITU general secretary (UN)

First cybersecurity dialogues (RO)

2010

First national cybersecurity congress (RO)

2002

 IMRS (Romanian-Swiss multimedia institute)

Conscious and responsible **Public Institutions and Private Companies** have **Cybersecurity as a major strategic goal**. Instead of incurring known and unknown threats, they successfully translate one of the most complex issue into knowledge, actions and governance, which mitigate the risk of cybercriminal damages.

Through conversations and interactive workshops with world respected experts in cybersecurity, the unique **PAN-EUROPEAN CYBERSECURITY-DIALOGUES** congress offers to public and private decision makers to gain control and to engage their organizations into tackling cyber-criminality continuum.

PAN-EUROPEAN CYBERSECURITY-DIALOGUES, joined since 2010 by Prof. Laurent Chrzanovski, is a **journey started in 2002 by the Swiss Academy**, which predicted today's challenges and offers **today and tomorrow's solutions**.

The SEVEN WAYS pan-European cybersecurity dialogues help public and private decision makers:

1. **Top notch networking:** hand-picked speakers and attendees learn and share during 2 full days in a safe environment (don't miss the diners!).
2. **Public AND private:** diversity of views and thoughts is the only way to solve one of (if not) the biggest challenge of our time.
3. **Blended perspective:** here we're breaking the silos and hierarchy. CEOs, functional heads, cybersecurity specialists and non-specialists come together because *none of us is as smart than all of us*.
4. **Nobody is left behind:** whether you're a speaker or an attendee you're called to share your questions and/or your knowledge and/or your best practices... that's what we call diversity in practice.
5. **CYBERSECURITY-DIALOGUES means business:** indeed, visibility and care are nurtured for our sponsors and speakers because they're purposefully contributing to our world sustainability.
6. **Learn and tips from those who run critical systems:** critical services and infrastructures providers and military are there to share the do's and don'ts.
7. Last and foremost, **CYBERSECURITY-DIALOGUES means collaboration:** the depth and breadth of the two days congress favor organization-specific, public-private, cross-states and cross-business projects opportunities.

"after these two days you know what cybersecurity is" Col. Marc-André Ryter, Swiss army
"Excellent and needed. I have been having pleasure to be part of it", Mika Lauhde, Sr VP, Huawei
